Logperts Ground

Is there a need to move things around? In UAE or between any locations in GCC? On Road?
Come to us. **LOGPERTS**

We have been moving things safely to reach destinations across GCC on time – first time and every time, that's why we enjoy repeat businesses from almost 90% of our clients.

What all can be moved through Logperts Ground?

Be it over dimensional cargo, project cargo, temperature managed cargo, general cargo, dangerous cargo – name it, we have solutions for the same – on the road, to get moving. Pronto. Instead of adjusting cargo to the available fleet, we make right-fit fleet available depending on the cargo, its type and destination.

Let the deliveries be - Local, Next Day, Long Distance, National, Borders to be Crossed, Normal, Non – Standard; be it for any distance, any weight, any volume – Logperts ground arranges to move it, track it, monitor it till the client is happy. And Partners too.

How important is CARE in the operations of Logperts Ground?

We take complete care about the fleet (cleanliness, operational efficiencies, wastage minimizing initiatives) - operating & controlling staff, associated partners, regulatory compliances – so that as a client or client's customer – all stakeholders are at peace and happy always.

Safety Begets Quality

Quality **Begets** Satisfaction

Satisfaction of clients is key to success in Business. We at Logperis believe preventive care and safety go hand in hand which is never ending process. This belief always complements the completion of tasks, trips, deliveries, documentation – all aspects of transactions and transportations are amply checked, re-checked and then only gets closed. That's how we care transportation at Logperis Ground., so that Clients can focus on their other important activities and leave all complexities of moving things around to us for a safe, on-time delivery closure.

Services:

Last & Final Mile:

B2B, B2C, across GCC & select locations across the world.

First Mile:

Pick up from manufacturing points or assembling locations and delivering directly to the Primary storage or distribution/sortation centers, or as desired by client's business needs.

White-Glove:

Specialized handling for discrete last-mile deliveries like valuables, insignia, gifting during celebration etc and for B2B deliveries which require additional care all through.

(Truck Taxi Solutions)

Trucking as a Taxi Service: (TTS)

Can Trucking as a service or as a business can be as smooth and steady as say, a Taxi service? Like, you pay for the utilization based on used duration and distance travelled? Along with a dependable tracking & payment solution?

This is a pertinent question and a doubt of both the service providing fleet owners and service needing client organizations.

With our decade long expertise in the field of road transportation and its associated nuances, Logperts is offering a market-first platform – TTS App to bring both service providers and clients onto a single platform.

A no-hassles app – TTS App for both clients who want to use transport and providers who are offering services.

From Booking to Proof of Delivery. From driver's PPE to Payment. All through app or clicks without any human interventions in almost all scenarios. And we prove ourselves during exception management situations.

As of now, almost 40% upwards of individual / independent fleet owners in UAE are already associated with us and are in the process of onboarding into our platform.

These owner - operators are from different nationalities like Jordan, India, Syria, Pakistan, Egypt etc. Similarly, a major part of our clients is also getting on to this platform for the required balance and utility of this TTS App.

Maybe we are at the cusp of history, where such TTS App for transportation stakeholders is being built up with UAE as a base - going to be available wherever goods transport is happening.
